※【Summary of the additional resolution with respect to the amendment to the Worker Dispatch Law】

The government should carry out the following appropriate measures with respect to the enforcement of the Worker Dispatch Law:

- After one year or so has elapsed from the enactment of this Law, steps should be taken to reassess the main issues regarding the modality of registration-type dispatching, the modality of dispatching for manufacturing operations, and the modality of specified worker dispatching undertakings. The Labour Policy Council should also begin deliberating on these issues.
- Steps should be taken to begin considering the review of the present system, under which the handling of the period of temporary staffing changes significantly depending on whether activities fall within the scope of the so-called 26 specialist business types, in order to make it easier for temporary staff, temporary staff dispatching business operators, and clients to understand. Steps should also only be taken within the limit necessary for enforcement to carefully and appropriately control period violations with respect to the instruction and supervision of period limitation violations up to the time a decision is forthcoming after consideration. Regarding the application of employment contract application rules, careful advice should be given to business owners and workers whether incidents fall within the scope of period limitation violations.
- Every effort must be made to carefully and appropriately undertake instruction and supervision with respect to so-called fraudulent contracting. It is also important to definitively clarify intentional cases of fraud that fall within the scope of deemed employment contract application rules and regulations. At the same time, steps should be taken to put in place clear classification standards for worker dispatch services and contracting.
- Every effort must be made to make public the details of steps taken to establish a deemed employment contract application system and to solicit opinions in order to prevent any contraction in temporary staff employment opportunities.
- Steps should be taken to consider efforts to thoroughly strengthen the promotion of labour and social insurance application for temporary staff. This should also include consideration regarding the implementation of specific laws that encompass labour and social insurance application promotion measures recorded in the temporary staff dispatching business operator and client guidelines within this Law.
- Appropriate instruction and advice, including the application of a temporary staffing business proper operation of worker dispatching undertakings association system, should be taken together with such efforts as the thorough observance of laws and regulations as well as the improvement of temporary staffing work terms and condition in order to nurture outstanding temporary staff dispatching business operators.
- Temporary staff dispatching business operators should secure education and training opportunities for temporary staff and efforts should be made to consider the putting in place of a permanent mechanism for developing essential skills and abilities to ensure the stability of employment of temporary staff and the temporary staffing industry as a part of overall efforts to develop the work skills and abilities of temporary staff.
- In enforcing this Law, every effort should be made to make public, provide information, and ensure widespread understanding of the details of these amendments including the in principle prohibition of temporary staffing on a daily basis, the promotion of a changeover to indefinite temporary staffing employment, efforts to ensure parity of treatment with respect to compensation, and the public disclosure of margins in advance among temporary staff dispatching business operators, temporary staff, and clients.
